

Visit to Central Laboratory Gujarat Ecological Educational and Research Foundation, Gandhinagar organised by Chemistry Department, LJIAS

The visit was conducted on 6th Feb 2017. Total 85 students of Semester 4 Chemistry Department have participated in the visit.

The objective of this visit was to enhance the practical potential of the students. The visit to a research laboratory is for exploring the short term cognitive and affective effects on students. The benefits of this visit includes (a). The student's level of understanding and information about the institutional functioning of research laboratory. (b). Career orientation in scientific profession.

The visit of the research laboratory helps the students to get the information about the techno-scientific content of the laboratory, set up's of the research laboratory, knowledge about latest scientific instruments and sincerity about the work.
