

***Industrial Visit to Cadilla Healthcare Limited (Topical Unit),
Sarkhej Bavla N. H. No. 8A, Changodar Road, Taluka
Sanand, organised by Department of Chemistry, LJIAS***

The visit was conducted on 8th July 2017. Total 100 students of Semester 5 Chemistry Department have participated in the visit. The college has hired two buses to take the students to Cadilla Healthcare Limited.

We left Cadilla Healthcare Limited at around 10 am. We reached there at around 10.45 am where the tea/coffee and snacks were organized at the canteen of the unit.

After the tea and snacks at the unit, we were welcomed by one of the representative of Cadilla Healthcare Limited. He has shared a nice interaction about the experiences regarding profession.

The visit was conducted for the students of last year to give them insight of industry life. The plant is manufacturing unit of topical drugs particularly emulsions and aerosols that are used in topical applications. After the interaction students were divided in the group of 20 for the round in the unit. In each round students were taken through sterilisation unit, manufacturing facilities, packaging facilities etc. They have taken students to their different departments like production QC, QA, ADL. In ADL department they have thoroughly explained the instruments which they have used for the analysis such as HPLC and GC. The visit was so exciting and interactive that it took us around two hours to just have a look on available facilities. At the end after coming out of the company, students individually thanked the officials for permitting them to visit such an exceptional pharmaceutical unit. They also appreciated for organizing such an event, which will help them decide their path towards success in future.

With an expectation of more such industrial visits, we started our journey back to the campus at around 2:00 pm. The tour reached campus at 02:45 pm. The tour was comfortable, informative and entertaining.
