

SAVE TREE, SAVE LIFE Tree Plantation Program at LJ Campus by LJMCA

Trees furnish us with life's two important essentials .i.e. food and oxygen. Besides these, they provide us shelter, medicine and tools. Trees enhance our life quality by bringing natural elements and wildlife habitats into urban settings. But unfortunately their number is decreasing at a greater rate on the earth because of man made activities. Thus their value is increasing day by day.

As a human being, it's our job not only to understand the importance of trees in our lives but also to save them. Saving tree does not mean only to save the planted trees but to plant new ones. Thus to make our city clean and green, **LJMCA** has conducted a **TREE PLANTATION** program on 13/08/2016.

The objective of the program was to make everybody understand that **“Save trees, save life, is not only a slogan, it is a responsibility which should be followed by each and every person living on the earth”**.

The program was executed by our young and dynamic students and the team of gardeners with great enthusiasm and hope. Faculty members too participated in the program to support the young team.

In total, 70 different trees were planted in our campus and the students tagged the plants by their names to show their affection towards nature. Thus the first move in fulfilling the dream of making our city clean and green completed successfully.

We are truly thankful to Prof. B. M. Peerzada-President-LJK, Dr. Manish Shah-Vice-President-LJK, Mr. Piyush Anandjiwala-Estate In-Charge-LJK, Prof. Alok Manke- Honourable Director-LJMCA, the gardener and the team, the faculty members, office staff and all the students who supported us in all aspects in executing this program.
