

# Team Blackhawks (BAJA SAEINDIA)

BAJA SAEINDIA is an international event organized by Society of Automotive Engineers. This event is about Designing, Analyzing & Manufacturing an All-Terrain Vehicle which helps students to improve their technical knowledge in automobiles by challenging their strength beyond limits. TEAM BLACKHAWKS from L.J Institute of Engineering & Technology has been participating in this competition for two years.

First year they manufactured the car which had features like high durability, independent suspension system and higher stability but it's weight was 297 KG while this year they have designed their car which weighs only 200 KG and has features like automatic transmission, customized disc brake & a customized gear box.
